

# Earring size Chart

## Diamond studs:

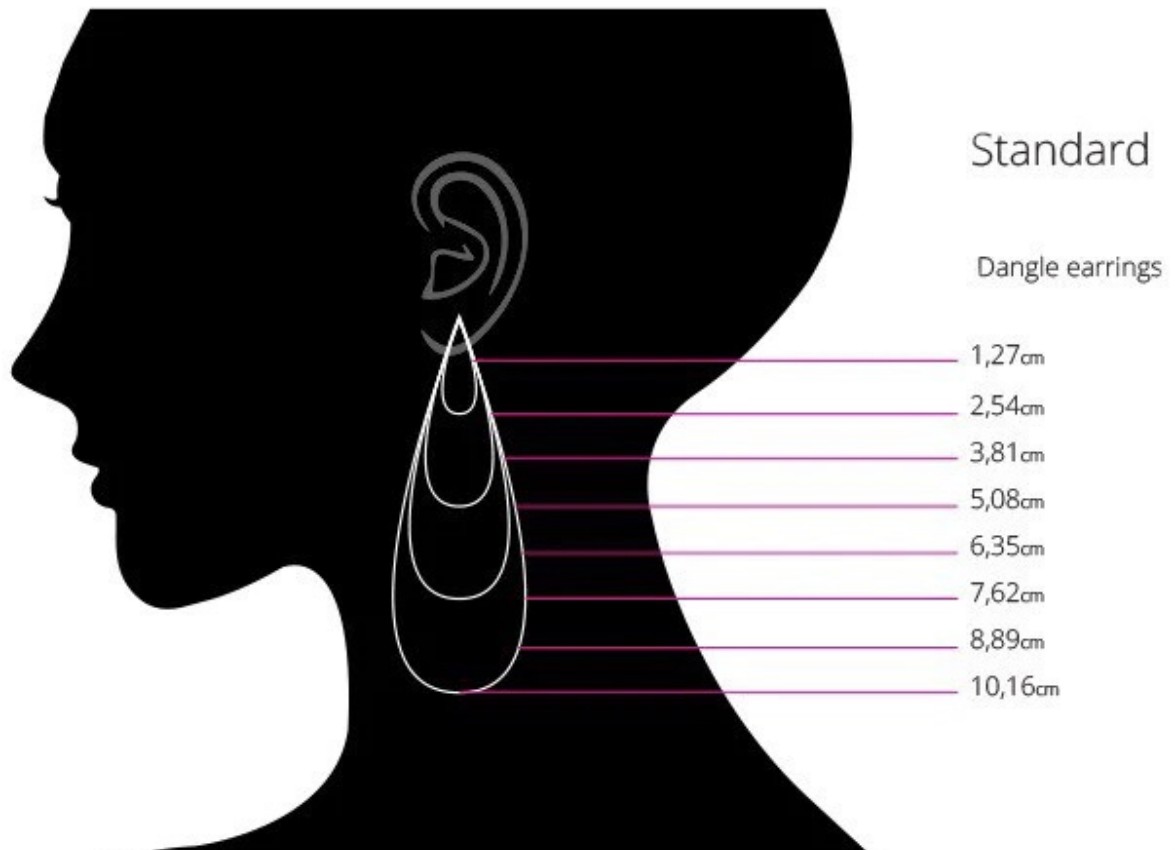

- Measured by carat weight and not size in cm/mm
- The weight indicated is per pair, not per stud unless otherwise noted.
- Depending on the cut, the stud size/dimensions can vary. As a general guide, diamond studs range from small 0.25ct.w per pair, measuring  $\approx 0.32\text{cm}$ , to large 2.00ct.w per pair, measuring  $\approx 0.65\text{cm}$

## DIAMOND STUD SIZE COMPARISON DIAGRAM

\*Above chart is for visual comparison only. Not true to size.

## Drop earrings:

In general, your comfortable length may be around 4-6cm (1.5"-2.3"). A drop pendant earring of 7-9cm (2.5"-3.5") may reach just below your jaw line or half-way down your neck.

- Lengths start from your piercing and can go up to 18-20cm.
- The best way to know what size is best for you is to measure, using a ruler, from your piercing to your preferred length.

\*These measurements provide a general guideline, and actual sizes may vary based on the specific design and preferences of the customer.

## Standard Huggies and Hoop sizes

Both hoops and huggies are suited to a multi-piercing look and are almost as versatile as studs. Lobes are the traditional place for piercings but cartilage piercings along the ear helix and on the conch and ear tragus have become very popular.

Depending on where the earring is worn on the ear, a different measurement will be required. The smallest huggies are worn on the helix and the tragus.

Follow these guidelines and enjoy shopping for your next pair of hoop earrings by choosing your preferred hoop size here.

## HUGGIES EARRINGS

Here are some common standard measurements in millimeters (mm) for Huggies earrings:

### Petite Huggies:

- Diameter: 10-15 mm
- Thickness: 1-3 mm
- Inner Diameter: 7-10 mm
- Weight: 1-3 grams

### Standard Huggies:

- Diameter: 15-20 mm
- Thickness: 1-4 mm
- Inner Diameter: 10-15 mm
- Weight: 3-6 grams

### Large Huggies:

- Diameter: 20-25 mm
- Thickness: 2-5 mm
- Inner Diameter: 15-20 mm
- Weight: 6-10 grams

\*These measurements provide a general guideline, and actual sizes may vary based on the specific design and preferences of the customer.

## HOOP EARRINGS

Here are some standard measurements in millimeters (mm) for hoop earrings:

### Small Hoop Earrings:

- Diameter: 10-20 mm
- Thickness: 1-3 mm
- Weight: 1-3 grams

### Medium Hoop Earrings:

- Diameter: 20-40 mm
- Thickness: 2-4 mm
- Weight: 3-8 grams

### Large Hoop Earrings:

- Diameter: 40-60 mm
- Thickness: 3-6 mm
- Weight: 8-15 grams

### Extra-Large Hoop Earrings:

- Diameter: 60+ mm
- Thickness: 4-8 mm
- Weight: 15+ grams

\*These measurements provide a general guideline, and actual sizes may vary based on the specific design and preferences of the customer.
